

EZITIG 200AC/DC

200A - INVERTER AC/DC PULSE TIG WELDER

Cutting edge IGBT Inverter Technology produces professional results on workshop or on-site projects!

WORKSHOP SERIES

- 200A pulse welding output
- Only 7kg - super light weight, compact and portable
- AC/DC function for a wide variety of jobs including mild steel, stainless steel & aluminum
- Pulsed welding output up to 200Hz for highly cosmetic finishes
- Factory stress tested to 440v to ensure rugged reliability
- Easy setup and operation control panel with live digital display
- Includes 4m WP26 TIG torch, ARC leads, earth leads and argon regulator for quick setup
- 60% @ 150A duty cycle
- Quick connect gas fitting for quick change gas bottles.

WELDS ALUMINIUM!

Dimensions: (L x W x H)	410 x 146 x 278
Weight:	7kg
Input Power:	230V, 15A
Max. Input Current:	40.7A
Generator Capacity:	9.3kVA

TIG Output Current:	10 - 200A
MMA Duty Cycle:	170A @ 15%, 140A@60%, 110A @100%
DC TIG Duty Cycle:	200A @ 25%, 140A@60%, 110A @100%
AC TIG Duty Cycle:	200A @ 25%, 155A@60%, 120A @100%

Electrode Size	1.6 - 4.0mm
TIG Pulse Frequency:	0.5 - 200Hz

200A | **WELDS 12MM STEEL** | **18 MONTH* TRADE WARRANTY**
8MM ALLOY | with product registration

With 15A Plug - Ideal for workshop projects - and Commercial power Supplies
